

Call on NGS with EPA/DOI

Colleen McKaughan to: Deborah Jordan, Anita Lee, Ann Lyons 10/11/2012 04:16 PM

Hi,

Here are the major points from the call:

Not responsive

Action item: Tamara is to develop outline of implementation plan. Region 9 will help with the specifics of the communications since we have to do this anyway for the BART determination.

Exemption 5

Action item: Region 9 needs to follow up with Tamara midweek next week.

Not Responsive

Scanned docs from Black Mesa Trust meeting last week

Anita Lee to: Deborah Jordan, Colleen McKaughan, Ann Lyons

11/26/2012 12:34 PM

Hi all,

I scanned and attached the documents from our meeting last Tuesday with Wahleah Johns, and Nicole and Marshall Horseherder.

I will email the 2 docs related to the N-aquifer to David Albright in water, and ask that he follow up directly with them on their request for a Sole Source Aquifer designation.

Generally the NGS transition proposal involves building a large scale renewable project at the closed Black Mesa Mine by 2019 to replace BOR's share of NGS (and retire BOR's share of NGS), retire LADWP and Nevada Energy's share of NGS by 2019, and retire NGS fully with replacement solar by 2029. I haven't read through the documents yet (but I will).

Please let me know if there is something specific we should do with the documents, otherwise, I will try to reference them in the TSD for our proposal (to the extent it relates to the 5 factor analysis, or brief discussion, as an example, of alternatives raised by Tribes or Tribal NGOs) and include them in the docket.

Thanks!

anita

Hello. Thank you for the heads up email notice and the indications of the timing for releasing the federal agencies' joint statement.

Please let us know if you would like to have a conference call or direct communication with President Shelly prior to the release of the statement, and of course any information about the timing for release of the Proposed BART Rule for NGS.

Stephen, Dana and Kate:

The Interior Department, EPA and DOE will soon be releasing a joint 3-agency statement that lays out the agencies' shared goals for Navajo Generating Station and energy production in the region served by the NGS. The joint statement declares that the agencies will work together to support Arizona and tribal stakeholders' interests in aligning energy infrastructure investments made by the federal and private owners of the NGS with long term goals of producing clean, affordable and reliable power, affordable and sustainable water supplies, and sustainable economic development, while minimizing negative impacts on all who currently obtain significant benefits from NGS, including Indian tribes. It also expressly underscores the importance of considering federal trust responsibilities in relation to NGS.

We are reaching out specifically to Navajo, Hopi and Gila River representatives, and perhaps to other tribes who depend on CAP water, to give you a heads up on our upcoming release of this document. We expect to release it within the next couple of weeks. Please give me a call or send me an email if you have any questions.

Thanks, Letty ___

Hi Colleen.

Thanks for returning my call.

I wanted to ask some additional questions related to the anticipated 3-agency statement, and BART for NGS again.

Steve did convey to us that there is a 3-agency statement anticipated in the next 2 weeks. I may be wrong, but I think that the anticipation of others about the 3-agency statement has led to speculation that BART for NGS will also be proposed around the same time as the 3-agency statement is made. Just my 2 cents about the rumor that BART is about to be proposed....

We are requesting that EPA call President Shelly directly to inform him of the 3-agency statement, and of course, to call President Shelly before BART for NGS is released publically – much the same way as the ANPRM was announced – President Shelly was given a heads-up right before the ANPRM was released. I am certain that President Shelly would very much appreciate a call(s) before both the 3-agency statement and BART for NGS are released to the public.

We can help with arranging a call to President Shelly.

Eugenia

U.S. Department of Energy 202-586-4940

FOR IMMEDIATE RELEASE January 4, 2013

Interior, Energy, EPA Commit to Cooperative Working Group to Achieve Shared Goals on Navajo Generating Station in Arizona

WASHINGTON - Today the Department of the Interior, Department of Energy and the Environmental Protection Agency released a joint statement that lays out the agencies' shared goals for Navajo Generating Station (NGS) and energy production in the region served by NGS.

In the statement, the three agencies agree they will work together to support Arizona and tribal stakeholders in finding ways to produce "clean, affordable and reliable power, affordable and sustainable water supplies, and sustainable economic development, while minimizing negative impacts on those who currently obtain significant benefits from NGS, including tribal nations."

In addition to identifying shared goals, the statement announces specific activities the agencies intend to take jointly to help achieve those goals. These actions include: 1) creating a long-term DOI-EPA-DOE NGS working group; 2) working with stakeholders to develop an NGS roadmap; 3) committing to complete the second phase of the National Renewable Energy Laboratory's report on clean, affordable, and sustainable energy options for NGS; and 4) supporting near-term investments that align with long-term clean energy goals.

A copy of the Joint Statement is available at http://epa.gov/air/tribal/pdfs/130103 statement ngs.pdf.

NGS is a coal-fired power plant located on the Navajo Indian reservation approximately 15 miles from the Grand Canyon and owned partially by the Interior's Bureau of Reclamation (Reclamation). Power from the facility is distributed to customers in Arizona, California, and Nevada. Reclamation's share of the power is used to move water to tribal, agricultural, and municipal water users in central Arizona.

The Department of the Interior, the Department of Energy, and the Environmental Protection Agency oversee other federal responsibilities or interests that relate to NGS. These include tribal trust responsibilities, protection of national parks and wilderness areas, visibility and public health protection, and clean energy development.

U.S. Department of Energy 202-586-4940

FOR IMMEDIATE RELEASE

January 4, 2013

Interior, Energy, EPA Commit to Cooperative Working

Group to Achieve Shared Goals on Navajo Generating Station in Arizona

WASHINGTON - Today the Department of the Interior, Department of Energy and the Environmental Protection Agency released a joint statement that lays out the agencies' shared goals for Navajo Generating Station (NGS) and energy production in the region served by NGS.

In the statement, the three agencies agree they will work together to support Arizona and tribal stakeholders in finding ways to produce "clean, affordable and reliable power, affordable and sustainable water supplies, and sustainable economic development, while minimizing negative impacts on those who currently obtain significant benefits from NGS, including tribal nations."

In addition to identifying shared goals, the statement announces specific activities the agencies intend to take jointly to help achieve those goals. These actions include: 1) creating a long-term DOI-EPA-DOE NGS working group; 2) working with stakeholders to develop an NGS roadmap; 3) committing to complete the second phase of the National Renewable Energy Laboratory's report on clean, affordable, and sustainable energy options for NGS; and 4) supporting near-term investments that align with long-term clean energy goals.

A copy of the Joint Statement is available at http://epa.gov/air/tribal/pdfs/130103 statement nttp://epa.gov/air/tribal/pdfs/130103 statement

NGS is a coal-fired power plant located on the Navajo Indian reservation approximately 15 miles from the Grand Canyon and owned partially by the Interior's Bureau of Reclamation (Reclamation). Power from the facility is distributed to customers in Arizona, California, and Nevada. Reclamation's share of the power is used to move water to tribal, agricultural, and municipal water users in central Arizona.

The Department of the Interior, the Department of Energy, and the Environmental Protection Agency oversee other federal responsibilities or interests that relate to NGS. These include tribal trust responsibilities, protection of national parks and wilderness areas, visibility and public health protection, and clean energy development.

Joint Federal Agency Statement on NGS

Anita Lee to: Wahleah, tonizhoni

01/04/2013 04:44 PM

Hello Wahleah, Nicole, and Marshall,

Thank you again for talking with us about your ideas related to Navajo Generating Station. I wanted to keep you updated on NGS, in case you haven't already heard. Today, the EPA Administrator and the Secretaries of Interior and Energy, signed a joint statement regarding NGS. It is attached.

2013_0104 Joint Federal Agency Statement on NGS.pdf

Subject: Re: NGS BART Prop Rule Status?

Hi--very nice to hear from you. thanks for your kind words about the Joint Statement. We are very pleased with it too, and also looking forward to the work getting started.

On the proposed BART, we are going to be putting it out on friday. I understand that Jared has a call scheduled with President Shelly for 2:30 MST tomorrow. We'll also have other opportunities for calls and meetings after the notice goes out, so please let us know if you'd like to set something up.

Subject: NGS BART Prop Rule Status?

Hello, I want to thank you directly regarding the recent Joint Statement from USEPA, USDOI and USDOE. I look forward to the next steps for the proposed NGS Work Group.

Can you clarify whether the anticipated proposed rule for NGS BART (NOx) will be issued before or after the proposed NGS Work Group is established?

We did a briefing for Arizona Congressional staff yesterday on this action, which was well attended. Senator McCain, Congresswoman Kirkpatrick, and Congressman Barber offices have all expressed interest in the working group that we announced with the joint statement. I wanted to let you know so DOI can reach out to those offices when the time is right. Nick Matiella of Sentator McCain's office specifically requested Letty's contact information, so I also wanted to give you a heads up before he calls.

If you have any questions, please do not hesitate to call me at (520) 498-0118. I will be at my desk all day.

Subject: Re: Next steps on three - agency statement?

hi Colleen,

It has been nice not to be thinking NGS all day every day! But yes, definitely time to pick it up again. We have also gotten a few requests to make sure a group is involved in whatever process we set up. Janet asked me to keep a list, so I've been doing that. We should merge lists.

It looks like there is a meeting with Janet and her DOI and DOE counterparts Feb 12 to talk next steps, so we need to get some ideas and plans ready for that meeting and generally get ourselves organized. (It looks like just EPA on the invite list but I think from the info in the message and something Janet said the idea is for all 3 agencies to talk. I'll confirm that with Emily.)

Maybe we should chat about ideas and then you can talk to Debbie and then one or more of us will talk to Janet before the 12th? If we follow the pattern from last spring Janet will also want to touch base with Letty about meeting planning before the meeting.

Hi, Tamara,

I hope you have been enjoying the post-NGS proposal experience, as we have. But I have to drag you back in.....

I have been getting a number of questions about the 3-agency process, especially whether it will be a stakeholder process. I have already received requests from 3 AZ Congressional offices, NPCA, and Sierra Club to be included. I saw some meeting invitations from Janet that were then cancelled. I assume we need to get the Deputies together and that would require some pre-work. Any intel that you have would be appreciated. Thanks!

re: Prep for the 2/12 interagency meeting on NGS 3 agency path forward

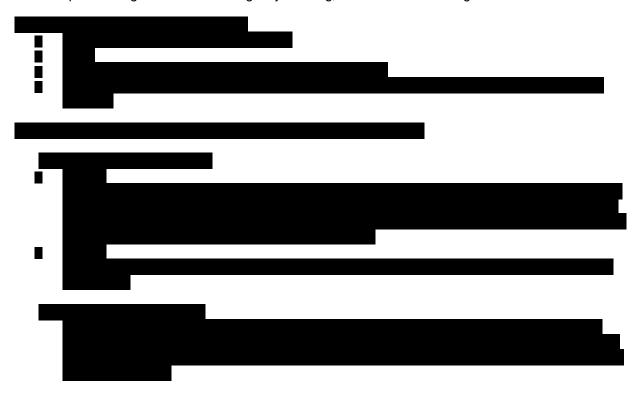

Tamara Saltman to: Janet McCabe, Deborah Jordan, Colleen McKaughan

02/06/2013 01:41 PM

Colleen and I did some brainstorming this afternoon, on top of some thoughts Janet and I emailed back and forth late last week. I'm collecting them all here to kickstart and hopefully speed our planning conversation tomorrow afternoon (5pm eastern, 3 pm mountain, 2 pm pacific).

First, we were thinking the meeting 2/12 would be a small group "get organized" meeting. At last check there were 15 people on the invite list, so it may be a bit unwieldy but doable.

Here's a potential agenda for the interagency meeting, with some initial thoughts below each issue.

All redactions on this page are withheld Exemption 5

Re: revised agenda for 3-agency meeting Deborah Jordan to: Janet McCabe, Tamara Saltman

Deborah Jordan to: Janet McCabe, Tamara Saltma Cc: Colleen McKaughan, Jim DeMocker, Emily Atkinson

The agenda looks fine; thanks, Tamara.

We look forward to talking to you this afternoon in preparation for Tuesday's discussion.

Deborah Jordan Director, Air Division U.S. EPA Region 9 (415) 972-3133

Janet McCabe Great! Emily, can you please add the meeting... 02/07/2013 11:11 AM MST

Subject: prep for three agency meeting next week

I had breakfast with Letty Belin and we talked about the meeting coming up next week and the BART proposal. I wanted to pass along a few things, questions and thoughts for next steps ...

Three agency meeting--

- --I shared the beginnings of the agenda Tamara sent last night and we agreed tentatively that we should spend the first hour discussing the group itself--the issues you guys listed out: sharing goals, organization, logistics, how to involve stakeholders, communications, first deputy-level meeting--and the last 30 minutes on the NREL Phase 2 report (scope, funding, timing). Letty's fine with chairing the meeting, but really appreciates the help we're providing. I said we'd turn Tamara's preliminary thoughts into a more official looking agenda. Tamara--are you in a position to do that today? I'd like to get it over to Letty this afternoon with the goal of her sending it out to the attendees tomorrow so they have some time to think about it.
- --Emily--do you know how many RSVPs you've gotten for the meeting and whether we will have anyone needing to video in? I want to make sure we're in a big enough room and have working videoconference. Debbie, Colleen--do you want to participate by video?

Thanks, all

Subject: RE: navajo generating station

Hello. Thank you for the heads up email notice and the indications of the timing for releasing the federal agencies' joint statement.

Please let us know if you would like to have a conference call or direct communication with President Shelly prior to the release of the statement, and of course any information about the timing for release of the Proposed BART Rule for NGS.

SBE

From: Belin, Letty [letty_belin@ios.doi.gov] Sent: Monday, December 31, 2012 9:53 AM

To: Stephen B. Etsitty Cc: kate hoover

Subject: navajo generating station

Stephen, Dana and Kate:

The Interior Department, EPA and DOE will soon be releasing a joint 3-agency statement that lays out the agencies' shared goals for Navajo Generating Station and energy production in the region served by the NGS. The joint statement declares that the agencies will work together to support Arizona and tribal stakeholders' interests in aligning energy infrastructure investments made by the federal and private owners of the NGS with long term goals of producing clean, affordable and reliable power, affordable and sustainable water supplies, and sustainable economic development, while minimizing negative impacts on all who currently obtain significant benefits from NGS, including Indian tribes. It also expressly underscores the importance of considering federal trust responsibilities in relation to NGS.

We are reaching out specifically to Navajo, Hopi and Gila River representatives, and perhaps to other tribes who depend on CAP water, to give you a heads up on our upcoming release of this document. We expect to release it within the next couple of weeks. Please give me a call or send me an email if you have any questions.

Thanks, Letty

Letty Belin Counselor to the Deputy Secretary U.S. Department of the Interior 202-208-6291
